

Homework Week 7

Due: May 21st

The purpose of this assignment is to demonstrate your understanding of building apps that are setup in the App Store and use in-app purchase.

- Follow the [Human Interface Guidelines](#) when designing your app's UI

Functional Requirements

The app should consist of:

- An app built using any template for iPhone or iPad that:
 - You create a matching app in your iTunes Connect account
 - You create the appropriate profiles information in Certificates, Identifiers & Profiles on the Apple iOS Dev Center
 - Has at least one Test user created in iTunes Connect
 - Has at least one In-App purchase product
 - Can purchase (in sandbox) your product

Your App should log all the appropriate states of InApp purchase.

Since only you can run your app please include the following screen shots:

- iTunes Connect showing your app
- iTunes Connect showing your in-app purchase product
- App running on your device showing your “available apps” UX (Can be simple text view as in class)
- App running on your device showing sign-in/password dialog for purchasing
- App running on your device showing the “Buy” button
